

ACTION PLAN

The representatives of the American States, gathered within the VII American Space Conference framework, “Science and Technology for human development within a cooperative environment of peace culture and respect for space international law”, taking into account the will to strengthen regional coordination and cooperation, and considering the theme axis results: Education, Science and Technology, Natural Resources and Environment, Space Technology Specific Applications, instruct the Pro Tempore Secretariat to:

1. Promote participation, cooperation and the exchange of programs or projects related to:
 - a) Education, Development Investigation in Sciences, Technologies and Space Technology and Applications.
 - b) Environmental Protection and support for Sustainable development.
 - c) Natural disasters prevention and mitigation.
 - d) Climate Change.
 - e) Space Law and Administration.
 - f) Agriculture and food Security.
 - g) Cultural heritage protection.
 - h) Rational use of Natural Resources.

2. Promote the active participation of academic, scientific and legal institutions, from in and outside of the region; as well as the participation of agencies, commissions, space government entities, and of the United Nations specialized agencies in regional and international cooperation projects.

3. Strengthen the diffusion of space themes in the region in order to raise collective awareness about its importance, use and application.
4. Ensure the participation and support of United Nations Office for Outer Space Affairs to conduct workshops, symposiums and conferences related to space and legal science and technology development, to guarantee the implementation of this Action Plan.
5. Elaborate an annual work program for the duration of the protempore secretariat and report to the participant states on its progress and implementation.
6. Contribute to the organization of the VIII American Space Conference through joint work with TROIKA members.
